Hi Roger,

Attached for your information is a Pivot Table that I created from the dataset posted by EPA HQs at the EPA website. The national data is as of May 31, 2015. In the first three rows on top of the Pivot Table, you can click on "+All" and then select a particular state, Region, or system size from the drop down list. You will be able to see OH's data in this file.

In terms of RIII data, I was able to retrieve additional sample results of PFOA and PFOS that were reported to the UCMR data system since May 31, 2015. Attached are two files that contain all PFOA and PFOS detections within RIII from Jan. 1, 2013 through Nov. 2, 2015. I will see if I can do the same for OH.

Please let me know if you have any questions.
